

# CARAWEB

## Additional Information for I-Pad users

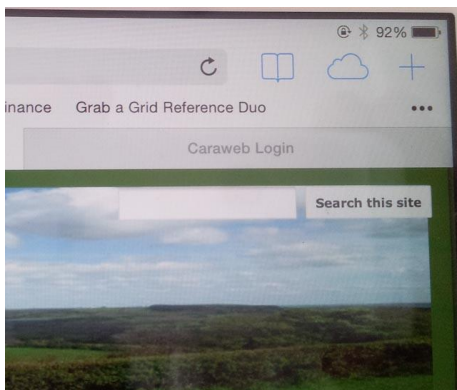

In Safari settings allow Names and Passwords

Open Safari and either refresh a page or close all the open pages (little x in left hand corner) and load a non-secure website from your bookmarks, such as [bbc.co.uk](http://bbc.co.uk)

This should bring up the login screen and, if you have been on before, this will be pre-filled – Login

We suggest you keep this page open and use the + tab to continue surfing.

When you have finished close down the pages and log out with the “1 hour logoff tab” on the Caraweb Page.
